

## HQ Acoustics Inspiration 1 mk I

The HQ Inspiration 1 mk 1 is a small footprint optimised transmission line loudspeaker that uses a 5" Magnesium coned bass/midrange driver unit and a wide dispersion ribbon tweeter.

This combination provides a very linear response and fast transparent sound with low distortion and excellent phase characteristics.

These two driver units provide an excellent full range speaker with a superbly extended but controlled bass, and a pure, detailed and transparent midrange and treble.

The Magnesium coned driver unit provide a very natural sound which is quite outstanding and very appealing.

The Stunning new HQ Inspiration 1 Mk 1 can be used in relatively small rooms but will also perform well in much larger rooms.

### SPECIFICATION

Impedance (ohms).....8

Dimensions mm.....810(H) x 191(W ) x 261(D)

Crossover kHz.....3.5khz 2nd order

Frequency Linearity...+ /- 1.5db (250hz to 22khz)

Power handling (W) ..150

Sensitivity db.....86

Internal wiring.OFC Copper

Recommended minimum room size ft.12 x 12
